PROFESSIONAL SUMMARY

- Python Developer with expertise in building scalable full-stack applications using React and Python (FastAPI). Strong experience in developing reusable components, advanced state management (Redux), and RESTful API integration. Skilled in designing and implementing AI-powered solutions, including Retrieval-Augmented Generation (RAG), LLM integration, vector databases, and semantic search. Proficient in TypeScript, Node.js, and modern frontend frameworks, with a focus on performance optimization, clean architecture, and maintainable code.

EDUCATION

St.Joseph's Institute Of Technology
Bachelor of Technology in Information Technology
• Cumulative GPA : **8.66/10.0**

Chennai, Tamil Nadu
June 2019 – April 2023

WORK EXPERIENCE

Software Engineer
BUSoft Tech - (Full Time)

Dec 2023 - Present
Chennai, Tamil Nadu

- Developed scalable full-stack applications using **React, TypeScript, and Python (FastAPI)**, delivering high-performance and maintainable solutions.
- Built intelligent UI components in React integrated with **LLM-powered APIs**, enabling dynamic, AI-driven user experiences.
- Designed and implemented **Retrieval-Augmented Generation (RAG)** pipelines using vector databases and semantic search to enhance response accuracy.
- Integrated **Large Language Models (LLMs)** (OpenAI/LLM APIs) for chatbot, document Q&A, and automated content generation features.
- Implemented **vector database solutions** (FAISS / Pinecone / Chroma) for efficient document retrieval and embedding-based search.
- Managed application state using **Redux Toolkit** and handled asynchronous data flow between frontend and AI-powered backend systems.
- Integrated RESTful APIs using **Axios**, ensuring secure communication, error handling, and smooth interaction with AI services.
- Automated workflows using **CRON jobs** for data ingestion, embedding updates, and scheduled AI-driven report generation.
- Collaborated in Agile environments using **Git, CI/CD pipelines**, ensuring continuous delivery of scalable AI-integrated applications.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL (MySQL), NoSQL (MongoDB)
- **Technologies:** Python, FastAPI, RAG, LLM, React, Redux Toolkit, React Hooks, Material UI, Axios
- **Tools:** VSCode, POSTMAN, Workbench-SQL, Desktop GIT, Dev Tools

PROJECTS AND PROOF OF CONCEPT (POC)

Insurance Tenant Application (AI-Powered) (B2C) – Developed a full-stack web application using **React** and **Python (FastAPI)** to manage customer onboarding, insurance policy creation, payment processing, and invoice generation. Implemented **RAG-based AI features** to retrieve policy details, answer customer queries, and provide intelligent recommendations. Built user-friendly React interfaces for customer data entry, policy selection, and payment workflows, ensuring smooth user experience. Integrated secure REST APIs for handling customer details, insurance plans, and transaction data. Enabled automated invoice generation and real-time updates after successful payments.
