PROFESSIONAL SUMMARY

- **Full Stack Developer** with solid backend expertise in **JAVA** and **React**, specializing in building reusable components, state management, API integration, and performance optimization. Experienced in TypeScript, Redux, **Spring Boot**, REST APIs, Python and modern UI frameworks to deliver scalable, maintainable web applications.

EDUCATION

St. Joseph's Institute Of Technology
Bachelor of Technology in Information Technology
• Cumulative GPA : **8.66/10.0**

Chennai, Tamil Nadu
June 2019 – April 2023

WORK EXPERIENCE

Software Engineer - AI Powered
BUSoft Tech - (Full Time)

Dec 2023 - Present
Chennai, Tamil Nadu

- Developed and maintained scalable, high-performance front-end applications using **React, TypeScript, HTML, CSS, and modern JavaScript (ES6+)**.
- Built reusable React components, enforced efficient state management using **Redux Toolkit**, and optimized rendering performance.
- Configured and optimized frontend build processes using **Webpack and Babel** to improve application performance and maintainability.
- Integrated RESTful APIs using **Axios**, handling asynchronous data flow, error management, and secure API communication.
- Applied robust form validation and user input handling using **react-hook-form** with TypeScript.
- Developed backend services using **JAVA and SpringBoot**, integrating third-party services such as **Twilio SMS APIs and email systems**.
- Designed and scheduled background jobs using **CRON jobs** for automated report generation and email delivery.
- Worked with REST APIs, authentication, and backend business logic to support frontend workflows.
- Developed and maintained scalable RESTful APIs using **Python FastAPI** to support high-performance web applications.
- Followed Agile methodology with Git-based version control and CI/CD pipelines.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL (MySQL), NoSQL (MongoDB), JAVA, Spring Boot
- **Technologies:** React, Redux Toolkit, React Hooks, Material UI, Axios, Node.js, NestJS, Express.js, Python, FastAPI
- **Tools:** VSCode, POSTMAN, Workbench-SQL, Desktop GIT, Dev Tools

PROJECTS AND PROOF OF CONCEPT (POC)

Customer Churn Prediction and Factor Analysis (B2C) – Developed a full-stack web application using **Python Flask** to predict customer churn based on behavioral and demographic attributes. Executed the **AdaBoost machine learning algorithm** and deployed trained models using **Pickle** for inference. Incorporated backend prediction APIs with the frontend to display real-time churn results, improving data-driven decision-making.

E-Commerce Web Application for Skincare Products with Voice Assistance – Analysed and expanded a responsive e-commerce web application using **HTML, CSS, JavaScript, and Firebase**. Implemented secure user authentication and data storage using **Firebase Authentication and Firestore**. Merged **Alan AI voice assistant** to enable voice-based product search, navigation, and purchasing, enhancing user experience and accessibility.
